

Patient Safety

under the
wing of

Health *e-Connect*™

As a daily provider of healthcare services, you know just how difficult it is to meet the critical and confounding need to enhance your patients' safety, to lower your overall costs, and to improve your operational efficiencies - and to do so all at the same time!

New bar code-based solutions like bedside medication administration systems certainly are helping to achieve these goals. But the unfortunate truth is that most of the technologies in use today (e.g., line printers, embossers, etc.) do not support the on-demand generation of bar-coded forms and labels that these systems require to provide their maximum benefit. (Never mind the fact that the cost of maintaining these antiquated pieces of equipment is high and is driven even higher by the need to use pre-printed forms.)

Health e-Connect™ is a suite of output management solutions that enables healthcare organizations of all kinds to cost-effectively manage, print, fax, email, and archive on-demand bar-coded patient care forms and

labels throughout their facilities. Supporting both laser and thermal printing, it eliminates the need for line printers, embossers, and pre-printed forms - and eliminates their associated costs as well!

Based on a modular design, **Health e-Connect™** lets you implement the functionality you need today while laying the foundation for those you'll need tomorrow, thereby protecting and leveraging the investment you make now. And because it easily integrates with existing HIS and pharmacy systems by acting as a virtual printer and/or receiving HL7 transactions, it also protects and extends the investments you've already made in the solutions you've already deployed.

Health e-Connect™ is a great way to help reduce medication errors in a cost-effective and highly efficient manner. If you're looking for a way to automate the Five Rights of Medication Safety - Right Patient, Right Drug, Right Dose, Right Route, and Right Time - then this is the solution for you!

Enhance Patient Safety, Lower Costs, and Improve Operational Efficiencies!

Solutions For...

Pharmacy

- Pharmacy Labels
- Tall Man Lettering
- Outpatient Prescription Labels
- Bin Labels
- MARs
- Cart Fill Reports
- Rx Messaging/Intervention Integration with CPOE
- MAR Archival for Electronic MAR Downtime
- Downtime Pharmacy Labels

Admissions
